[01] THE ENTITY

BIO

FUTURE KILLER is a fuzzy yet tender rock experience guided by a flavor of joy that tickles the heart. The soundscape of each song varies through playful whirling whistles and brooding booms while maintaining a steadfast ensemble based band aesthetic- musicians collected to create choral chaos. Melodies meant to entice you closer to the existential themes of the lyrics with just enough groove to keep you entranced, like the hypnotic, pulsating color show of the predatory cuttlefish.

Proclaiming empowerment through acceptance of the self, the band's name drifts away from initial connections to "eventual violence" and leans towards its intended meaning-

a dismantling of the current timeline,
hoping to build a better tomorrow.
